

# Society of American Period Furniture Makers

**Fall Event September 29 & 30, 2018 with Ronnie Young**

## **building a cellarette**

Ronnie has built in excess of two hundred pieces of furniture in his distinguished career. Using his engineering background, he frequently draws the plans he builds, faithfully capturing each detail of the original piece. He constructs his own paterae, inlay, fretwork and moldings and often mills and dries the lumber for his projects.

Ronnie has a particular interest in period Tennessee furniture, and a significant number of his pieces are faithful reproductions of historic antiques from the eighteenth and nineteenth centuries, utilizing the same

wide boards as those the old masters used.

Ronnie Young is a master period furniture maker in his own right, yet it is his sincere love for his craft and desire to pass on the legacy that set him apart. Ronnie is passionate concerning period furniture and highly skilled at passing on his knowledge to others.

Saturday 9am – 4 pm and Sunday 10 am – 3 pm. Plans for the project will be available for a nominal cost. Ronnie will bring one completed cellarette and one with all the components loose so that they can be examined and he can use them to discuss his construction techniques including case work, dovetailing, inlay and veneering.

Location of the class is 3600 Pelham Drive Mobile 36619
